OBJECTIVE

Apply what I've already learned independently to an organized team environment, while getting first hand experience with the latest web technologies and working towards becoming a full stack developer.

TECHNICAL SKILLS

Primary Front End Technical Expertise
HTML5 CSS3 Javascript JQuery Bootstrap Git

Other Relevant Technology Experience
React, Gulp, Wordpress,Unix, SFTP, Ruby on Rails,

PROJECT EXPERIENCE

KF2Calc
Single Page Web Application for a popular video game
 https://tor020.github.io/Killing-Floor-2-Calculator/
- Utilizes Bootstrap framework fully supporting a mobile friendly design resizing for all screen sizes
- Communicated directly with userbase social media for feedback, bug fixes, and new features
- Over 100 hours debugging various components and utilizing JQuery Documentation Chrome Dev Tools and stackoverflow.com for solutions.Technologies:HTML5, CSS3, Javascript, JQuery, Bootstrap3, Git

To-do List
Single Page Web Application
https://github.com/Tor020/TodoWebApp
- The code architecture is styled after the model-view-controller pattern to show convention understanding
- All application functionality is handled by three different entirely modular Javascript objects that interact with each other.
- The todolist object represents the model, handlers object acts as the controller, and a view object to represent the view. Technologies: HTML5, CSS3, Javascript

Personal Portfolio Website
Showcase for Work Experience
https://tor020.github.io/
- Features numerous previously completed project gallery to display experience.
  Technologies: HTML5, Bootstrap4, CSS3, Javascript

EDUCATION

2010 — 2012

Lorain County Community College
